EXPERIENCE

source.one, pune — *Sr. QA Automation engineer*

MARCH 2022 - PRESENT

- Contributed to the development and enhancement of a comprehensive *Ui automation framework* using *Playwright* with *JavaScript*, implementing *Page Object Model* and **data-driven** testing architecture.
- Implemented *API* test scenarios using *Playwright*, transitioning from *Postman* to enhance coverage and efficiency.
- Contributed to building and deploying a *Jenkins*-based *CI/CD* pipeline, automating testing processes and supporting microservices integration.
- Conducted rigorous testing on *Android* and *iOS* platforms, ensuring optimal performance and user experience across devices.
- Worked closely with developers, business analysts, and stakeholders to align testing strategies with project requirements.
- Working alongside a team of 6 QA professionals (SDETs and manual testers), focusing on advanced automation, comprehensive testing methodologies, and ensuring high-quality software delivery.

FOIWE info global solution pvt. ltd., Bangalore — *QA*

FEB 2019 - AUG 2019

- Performed *functional*, *regression*, and *integration* testing to ensure high-quality software deliverables across various projects.
- Executed Browser compatibility and cross-browser Testing on various platforms, including Google Chrome, Firefox, IE, and Safari.
- Designed and executed test cases based on business requirements and user stories, ensuring comprehensive *test coverage*.
- Quickly grew from a fresher handling manual testing to an Associate Automation Engineer, improving testing processes through automation.
